Generated	09-07-2026 05:06	
Status	READY_FOR_SUBMISSION	
Fraud Type	SOCIAL_ENGINEERING	
Severity	CRITICAL	
Confidence	98.00%	

INVESTIGATION SUMMARY

Based on the victim's statement and hybrid AI analysis, this incident has been classified as **SOCIAL_ENGINEERING** with **98.0% confidence**. The overall risk level has been assessed as **CRITICAL**. Fraudsters manipulate victims through impersonation, authority, urgency, fear or trust to obtain money, OTPs, credentials or remote access.

AI DETECTED RED FLAGS

- Asks victim to install remote access apps.
- Attempts to gain remote control of the victim's device.
- Claims the victim is under digital or virtual arrest, a false concept used in cyber extortion.
- Claims victim is under digital arrest.
- Fraudster impersonates law enforcement.
- Impersonates an authority to gain trust.
- Impersonates police, CBI, ED, customs or similar authorities to create fear and compliance.
- Keeps the victim isolated on a video call to maintain control and prevent outside help.
- Pretends to be a bank representative.
- Requests installation of a remote access or malicious app that can capture payment approvals or device data.
- Requests installation of remote access software during KYC.
- Requests screen sharing or remote access during the fake investigation to view banking activity or steal credentials.
- The caller asks the victim to install a remote access or screen-sharing app, enabling device takeover.
- The message asks the victim to install an APK or remote access app, which can enable device takeover or credential theft.
- Uses fear and authority.
